Kevin Henry Computer Services

Specializing in Data Backup Computer Setup and Repairs

IT Professionals since 1982

My name is Kevin Henry. I have lived in this area my whole life and some of you know me through Little League or American Legion Baseball. I am reaching out to this area's home computer users to let you know that a remarkable technology has been developed that is now affordable for home users. It allows your computers to be backed up automatically without you having to remember to do it. Most of the time people just either forget to backup their computers or just assume that the data will be safe. This technology provides the same data encryption protection as the Pentagon. With over 30 years of experience in the computer industry I can honestly say that this is one of the best utilities ever created for the users of computers. We have been using it for the last few years in the business world and now the price has been lowered where it is affordable for the home user. \$125 a year is all that this costs. We come set it up for you and it automatically backs up your files without you having to do anything. If your computer crashes or your files get deleted you don't have to worry because they were automatically backed up. And...Any file that you add to your computer will automatically be backed up. So if you add a resume today it will automatically be backed up. Any file that you change will be backed up.

This is an opportunity that you should not pass on. Your family photos that are priceless to you. Your tax forms, resumes and school projects that are stored on your computer that would cause problems if they were lost. We provide a service that not only will backup these files, it will automatically back them up without you having to do anything. We do this all for one low price of \$125.00 a year. No hidden fees. No additional costs. And... We backup all of your computers that you have in your household. All for this \$125.00 fee.

**\$125.00 for all computers in
your household.**

Please don't pass on this opportunity. You owe it to yourself to not lose those precious photos and those important files that you cannot do without. And remember \$125 for all of the computers in your household. This is a small price to pay for your extremely important data. Please call us today so we can discuss this with you.
